# COVID-19 Critical Intelligence Unit

## **Daily evidence digest**

19 June 2020

The daily evidence digest collates recently released reports and evidence – provision of these links does not imply endorsement nor recommendation.

### Genome, telemedicine, ethics, dexamethasone trial

#### Peer reviewed journals featured:

- Genome-wide association study of severe COVID-19 with respiratory failure <u>here</u>
- Management of used PPE and COVID-19 waste in South Korea <u>here</u>
- A framework for managing anticoagulation-related gastrointestinal bleeding during COVID-19 here
- A modelling study on border control and quarantine measures <u>here</u>
- Design and development of COVID-19 risk assessment decision support system for GPs here
- International comparison of guidelines for managing neonates during COVID-19 here
- A retrospective study on a triage and telemedicine protocol to optimise infection control in an emergency department in Taiwan here
- Telemedicine enabled accelerated discharge of hospitalised COVID-19 patients to isolation in repurposed hotel rooms <u>here</u>
- Ethical analysis of: triaging critical care resources in COVID-19 <u>here</u> and media focus on healthcare workers as heroes during COVID-19 <u>here</u>
- A comment article on delivering evidence-based critical care for mechanically ventilated patients with COVID-19 here
- Diabetic foot disease management during COVID-19 here
- Changes in indications for radiotherapy during COVID-19 here
- Use of telemedicine and virtual care for remote treatment here
- A scoping review on diagnosing COVID-19 in the emergency department here

#### Letters and correspondence discussed:

- A negative pressure individual isolation system for CT scans of suspected COVID-19 patients here
- Infection control in the medical imaging department <u>here</u>
- A retrospective study on incidence of acute ischaemic stroke and rate of mechanical thrombectomy in a US tertiary care telemedicine network <a href="here">here</a>
- Prone positioning in awake, non-intubated patients with hypoxemic respiratory failure here

#### Pre-peer review papers feature:

- A systematic review and a meta-analysis of prevalence of chemosensory dysfunction <u>here</u>
- Cross-sectional survey on potential barriers and facilitators among high risk individuals for uptake of a COVID-19 vaccine here
- Observational cohort study on prevalence of delirium as a COVID-19 symptom in older adults here
- Longitudinal study on the National Early Warning Scores (NEWS /NEWS2) and COVID-19 deaths in UK care homes <u>here</u>
- External validation of the COVID-19 Vulnerability (C-19) Index using an international network of observational healthcare datasets here

#### **Guidance and evidence checks**

- The World Health Organisation (WHO)
  - o published a scientific brief on releasing COVID-19 patients from isolation here
  - o noted preliminary results on dexamethasone use in critically ill COVID-19 patients here
  - o announced discontinuation of the hydroxychloroquine arm of the Solidarity Trial here
- The Australian Health Protection Principal Committee also noted the dexamethasone trial here
- The Organisation for Economic Co-operation and Development (OECD) published a broad-ranging report on the impact of COVID-19 on young people here
- The Newfoundland and Labrador Centre for Applied Health Research released a report on strategies to reduce the impact of a second wave of COVID-19 in long term care facilities here

#### Twitter update

#### Second waves, mental health and patient-provider communications

From @MJA\_editor, cases increasing in China <a href="here">here</a>, @AFP also reporting on the new cluster and response in China <a href="here">here</a>, @minhealthnz New Zealand ends COVID-19 free streak <a href="here">here</a>, and from the Guardian <a href="here">here</a>. @EricTopol on the explainer of accuracy of false positive antibody tests to COVID-19 <a href="here">here</a> with and fast and strong responses save lives <a href="here">here</a>. @BMJ\_latest on decision making during COVID-19 <a href="here">here</a>.

@Ian\_Hickie, @LRussellWolpe tweeting about the mental health surge from local news sources <a href="here">here</a>, <a href="here">here</a> and blog from @BMJ\_latest on preparing for post-intensive care for COVID-19 patients through trauma-informed care framework <a href="here">here</a> and indirect impact of COVID-19 and the deconditioning pandemic <a href="here">here</a>. @Harwardhealth featuring a blog on global mental health in the time of COVID-19 here

@BMJ\_latest blog on how #COVID19 might change the patient-provider relationships <a href="here">here</a> and from @Jpex communication for equity during COVID-19 here.
