COVID-19 Critical Intelligence Unit

Daily evidence digest

25 June 2020

The daily evidence digest collates recently released reports and evidence – provision of these links does not imply endorsement nor recommendation.

Telehealth, comorbidities, depression and anxiety

Peer reviewed journals featured:

- A survey on variation in infection prevention policies and practices in US hospitals here
- Discussion on co-creating a human-centred health system post-COVID-19 here
- Optimising and implementing contact tracing through behavioural economics here
- Several articles focused on depression and anxiety:
 - An observational study on emotional distress in young adults during COVID-19 here
 - A survey on depression and anxiety among quarantined respondents <u>here</u>
 - A survey on academic emergency medicine physicians' anxiety levels, stressors, and potential stress mitigation measures during the acceleration phase of COVID-19 here
- Several articles focused on telehealth:
 - o A retrospective review of the utilisation of telehealth in a comprehensive cancer centre here
 - A national survey on telemedicine in Germany during COVID-19 here
 - An observational study from China on telemedicine for monitoring and management of home-quarantined cohorts <u>here</u>
- A viewpoint on preventing more deaths in care homes in a second wave in the UK here
- "COVOID" an individual contact model for exploring intervention and control strategies here
- A case-control study on outcomes in patients with severe disease treated with tocilizumab here
- An MJA primer on serological tests for COVID-19 here
- An article in Nature describes a COVID-19 government response event dataset <u>here</u>
- A mathematical model on the influence of population heterogeneity on herd immunity here

Letters and correspondence discuss:

The utility of ecological and epidemiological models are both useful for SARS-CoV-2 here

Pre-peer review papers feature:

- A systematic review and meta-analysis on the role of pre-existing chronic disease in cardiac complications from SARS-CoV-2 infection here
- A systematic review and meta-analysis of chest CT versus RT-PCR for the detection of COVID-19 here
- A web-based survey of 780,961 participants exploring comorbidities and incidence of COVID-19 here
- SARS-CoV-2 exposure, symptoms, and sero-prevalence in healthcare workers here
- Face mask use as a predictor of national COVID-19 related mortality here
- A population-based electronic health record analysis in 1.9m people regarding obesity during the COVID-19 pandemic here
- Health and economic costs of early, delayed, and no suppression of COVID-19 in Australia here
- Behavioural changes before lockdown, and decreased retail and recreation mobility during lockdown in 35 Western countries <u>here</u>
- An observational study on clinical characteristics of patients with 're-positive' test results here

Reviews and scientific briefs

- The Centre for Evidence Based Medicine published a review on inhaled corticosteroids for the treatment or prevention of COVID-19 here
- The National Collaborating Centre for Methods and Tools review on community engagement in COVID-19 infection prevention and control here
- The World Health Organisation released a scientific brief on breastfeeding and COVID-19 here
