COVID-19 indirect impact, role of centres of government, non-communicable diseases

Peer reviewed journals featured:

- A scoping review of randomised controlled trials of anticoagulant interventions in hospitalised patients with COVID-19 [here](#)
- Patient-reported measures reflecting on the impact of COVID-19-related healthcare closures on patient health and postoperative recovery [here](#)
- A Delphi-based decision-making support mechanism for outpatient management or hospitalisation of patients with proven or suspected COVID-19 [here](#)
- A risk prediction model for mortality outcomes [here](#)
- Commentary on non-drug interventions for COVID-19 [here](#)

Letters and correspondence discussed:

- Social distancing and cancer care during COVID-19 [here](#)

Pre-peer review articles featured:

- A study on the long-term survival of salmon-attached SARS-CoV-2 as a potential source of transmission in seafood markets [here](#)
- An analysis of COVID-19 preprints and their publishing rate [here](#)
- An observational cohort study on the prognostic accuracy of emergency department triage tools for adults with suspected COVID-19 [here](#)

Guidance and reports

- The OECD released a policy report on the role of centres of government in building resilience to COVID-19 [here](#)
- Guidance and reports from the World Health Organisation:
 - The COVID-19 global response strategy in the European region [here](#)
 - An editorial on safeguarding essential health services during COVID-19 [here](#)
 - A ministerial roundtable on lessons from COVID-19 in South East Asia [here](#)
 - A position paper on responding to non-communicable diseases during and beyond the COVID-19 pandemic [here](#) and related rapid review and actions [here](#) and [here](#)

News and blogs

- A BMJ webinar on the diagnosis, management, and prognosis of “long COVID” [here](#)
