# COVID-19 Critical Intelligence Unit

# Daily evidence digest – update edition

19 January 2021

This 'update edition' of the CIU Daily Evidence Digest includes publications from the holiday period. CIU digests collate recently released reports and evidence – provision of links to the evidence does not imply endorsement nor recommendation.

Distribution of regular daily digests will recommence tomorrow, 20 January.

# Saliva versus nasopharyngeal swabs, vaccine schedule and adverse events, post-acute COVID-19

### Peer reviewed journals featured:

- Systematic review and meta-analysis of saliva and nasopharyngeal swab nucleic acid amplification testing for SARS-CoV-2 here
- · Randomised trials on:
  - o A neutralising monoclonal antibody for hospitalised COVID-19 patients here
  - o Tocilizumab in patients hospitalised with COVID-19 pneumonia here
- An experimental study on the stability of SARS-CoV-2 on critical personal protective equipment <u>here</u>
- A simulation study on fluid dynamics of COVID-19 airborne infection here
- A comparison study of SARS-CoV-2 detection using self-collected saline gargle, oral swab and combined oral-anterior nasal swab versus provider collected nasopharyngeal swab <a href="here">here</a>
- · Cohort studies on:
  - Prevalence and risk factors for delirium in critically ill patients with COVID-19 <u>here</u> and associate commentary <u>here</u>
  - Risks of and risk factors for COVID-19 disease in people with diabetes in Scotland <u>here</u> and associated commentary <u>here</u>
  - The development and validation of the ISARIC 4C deterioration model for adults hospitalised with COVID-19 <a href="here">here</a>
- Modelling studies on:
  - Bidirectional contact tracing to improve COVID-19 control here
  - o SARS-CoV-2 transmission from people without COVID-19 symptoms here
- Observational studies on:
  - Correlation of population mortality of COVID-19 and testing coverage in 36 OECD countries <u>here</u>
  - o The failure of epidemic model parameter estimation here
  - Duration and key determinants of infectious virus shedding in hospitalised COVID-19 patients here
  - Psychological characteristics associated with COVID-19 vaccine hesitancy and resistance in Ireland and the United Kingdom here

- Immunological memory to SARS-CoV-2 <u>here</u>
- Medium-term effects of SARS-CoV-2 infection on multiple vital organs, exercise capacity, cognition, quality of life and mental health <u>here</u>
- o Antibody status and incidence of SARS-CoV-2 infection in health care workers here
- o Convalescent plasma antibody levels and the risk of death here

#### • Editorials on:

- o Vitamin D and COVID-19 here
- o Asymptomatic transmission of COVID-19 here
- The National Institute for Health and Care Excellence (NICE) guideline on post-acute COVID (long COVID) <u>here</u>

#### Commentary on:

- COVID-19 testing <u>here</u>
- Herd immunity by infection here
- Wastewater surveillance in monitoring COVID-19 vaccine distribution here
- New variant SARS-CoV-2 in the UK <u>here</u>
- o COVID-19 and the Swedish enigma here
- Long COVID guidelines and lived experience <u>here</u>
- o Allocating scarce intensive care resources during the COVID-19 pandemic here
- o The potential for COVID-19 breath diagnostics here
- o Emergence of a highly fit SARS-CoV-2 variant here
- The COVID-19 response in Australia here
- Elimination as the optimal response strategy for COVID-19 and other emerging pandemic diseases here

## **Guidance and reports**

- The Cochrane Library published updates to six special collections were updated <a href="here">here</a> and rapid scoping reviews on:
  - Care bundles for improving outcomes in patients with COVID-19 or related conditions in intensive care here
  - o Measures implemented in the school setting to contain the COVID-19 pandemic here
- The World Health Organization published guidance on:
  - Analysing and using routine data to monitor the effects of COVID-19 on essential health services here
  - Infection prevention and control principles and procedures for COVID-19 vaccination activities here
  - Interim recommendations for use of the Pfizer–BioNTech COVID-19 vaccine under emergency use listing <u>here</u>
  - Infection prevention and control guidance for long-term care facilities in the context of COVID-19 here
  - Rational use of personal protective equipment for COVID-19 and considerations during severe shortages here
  - A living guideline on therapeutics and COVID-19 here
  - COVID-19 weekly epidemiological update <u>here</u>

Health

The daily evidence digest collates recently released reports and evidence – provision of these links does not imply endorsement nor recommendation.

- First meeting of the technical advisory group on safe schooling during the COVID-19 pandemic in Denmark <u>here</u> and the second meeting <u>here</u>
- The Australian National COVID-19 Clinical Evidence Taskforce released new or updated recommendations and clinical flowcharts here
- A NICE COVID-19 rapid evidence summary on tocilizumab for COVID-19 here

## **News and blogs**

- BMJ news articles on:
  - Norwegian investigation of 23 deaths in frail elderly patients after the Pfizer/BioNTec vaccine here
  - o The evidence for extending the dosing interval here
  - Vaccine brands can be mixed in "extremely rare occasions" here
  - o Controversial rapid test policy divides doctors and scientists here
  - o Medical leaders call for revised PPE guidance to reflect new variants here
  - Past infection of healthcare workers provides 83% protection for five months but may not stop transmission <u>here</u>
  - o Convalescent plasma may cut deaths in patients not on ventilation here
  - When to start invasive ventilation with a lack of evidence here
- Nature news articles on:
  - o UK health-care workers suggesting most people are immune for months here
  - Scientists divided over dosing strategies for COVID-19 vaccines? here
  - o AstraZeneca joins Russia to boost coronavirus vaccine here
- JAMA news articles on:
  - Hospital readmission among COVID-19 survivors here
  - Health workers' antibody levels wane after SARS-CoV-2 infection here
