SARS-CoV-2 genome and antibodies in breastmilk, transmission rates in specific settings, Moderna and Pfizer vaccine efficacy against variants

Peer reviewed journals featured:

- Systematic reviews on:
 - SARS-CoV-2 genome and antibodies in breastmilk [here](#)
 - Transmission rates of SARS-CoV-2 in specific settings [here](#)
 - Comparing saliva and nasopharyngeal swab specimens for SARS-CoV-2 detection [here](#)
 - Telemedicine and e-Health research solutions for combatting COVID-19 [here](#)
- A review on the impacts of dexamethasone treatment for COVID-19 patients [here](#)
- A cohort study on Moderna and Pfizer-BioNTech vaccine-elicited antibodies to variants [here](#)
- An observational study on clinical frailty score and hospital mortality among COVID-19 patients in Europe [here](#)
- A survey based study conducted in April-May 2020 on burnout and psychological distress among Australian healthcare workers [here](#)
- Commentary on:
 - Fast track versus efficacy in SARS-CoV-2 vaccines [here](#)
 - Mistruths and misunderstandings about COVID-19 death numbers in the UK [here](#)
- An editorial on communication, language and changing the COVID-19 conversation [here](#)

Letters and correspondence discussed:

- Resilience, emotion and social support in frontline healthcare workers during COVID-19 [here](#)
- Rapid spread of multidrug-resistant gram-negative bacteria in COVID-19 units in the US [here](#)

Guidance and reports

- The World Health Organization published interim recommendations for use of the Astra-Zeneca (AZD1222) vaccine [here](#) and a supporting background paper [here](#)
- The Organization for Economic Cooperation and Development published a policy brief on primary healthcare and system adaption during COVID-19 [here](#)

News and blogs

- Trust in COVID-19 vaccines is growing [here](#)
- Public health, trust and tools to stop viral transmission [here](#)
