## COVID-19 Critical Intelligence Unit

### **Daily evidence digest**

22 February 2021

The daily evidence digest collates recently released reports and evidence – provision of these links does not imply endorsement nor recommendation.

# Years of life lost to COVID-19, payments for vaccination, news media and risk narratives, vaccine 'real world' effectiveness

#### Peer reviewed journals featured:

- Observational studies on:
  - Years of life lost (YLL) to COVID-19 in 81 countries <u>here</u>
  - Hospitalisation of COVID-19 patients discharged home from emergency departments in the US here
  - o Asymptomatic and pre-symptomatic SARS-CoV-2 transmission in Germany here
  - o Interleukin-3 as a prognostic marker in SARS-CoV-2 infections here
  - Post-mortem surveillance and 'hidden COVID-19 mortality' in Africa <u>here</u> and an associated editorial <u>here</u>
- Modelling studies on:
  - Machine learning based tool for early risk assessment of COVID-19 patients <u>here</u>
  - Social distancing measures, mobility data and infection rates <u>here</u>
- An experimental study on the impact of payments on the willingness to be vaccinated <u>here</u>
- Qualitative analysis of the media's construction of a risk narrative in Canada here
- An review of the role of online groups in keeping young people connected during COVID-19 here
- Commentary on:
  - Equity and effectiveness of COVID-19 vaccinations in the US <u>here</u>
  - o Trial-based evaluation of COVID-19 vaccines, post-rollout here
  - o Clinical monitoring and wearable technology here
  - The UK vaccine rollout to date here

#### Pre-peer review articles featured:

- A preliminary assessment of real-world effectiveness of Pfizer and Moderna vaccines in the US here
- Evaluation of a PCR assay to screen for variants of concern here
- Circulating SARS-CoV-2 variants escape neutralisation by vaccine-induced humoral immunity here
- A systematic review on artificial intelligence applications for COVID-19 in hospital settings here

#### **Guidance and reports**

 The National COVID-19 Clinical Evidence Taskforce released updated recommendations and clinical flowcharts <u>here</u>

#### **News and blogs**

• COVID-19 vaccine rollout on track to begin 22 February here
