

Daily evidence digest

5 May 2021

The daily evidence digest collates recently released reports and evidence – provision of these links does not imply endorsement nor recommendation.

Digital contact tracing, T-cell count as a prognostic marker, social distancing and airborne transmission, vaccine hesitancy

Peer reviewed journals featured:

- Observational studies on:
 - Digital contact tracing for COVID-19 [here](#)
 - T-cell count as a marker of COVID-19 clinical course severity and prognosis [here](#)
 - Social distancing in preventing airborne transmission of COVID-19 [here](#)

Pre-peer review articles featured:

- COVID-19 vaccine hesitancy in China and the US [here](#)
- Quantifying COVID-19 vaccine hesitancy during early rollout in Canada [here](#)

Letters and correspondence discussed:

- Immune thrombocytopenic purpura after SARS-CoV-2 vaccine [here](#)
