

Daily evidence digest

23 June 2021

The daily evidence digest collates recently released reports and evidence – provision of these links does not imply endorsement nor recommendation.

Child mortality in England during COVID-19, persistent pulmonary disease, sustainable long-term infrastructure for COVID-19 vaccinations

Peer reviewed journals featured:

- Observational studies on:
 - Child mortality in England during COVID-19 [here](#)
 - Race and COVID-19 outcomes among 2.6 million children in England [here](#) and associated commentary [here](#)
 - A simulation program to train airway management [here](#)
- An editorial on persistent pulmonary disease after acute COVID-19 [here](#)

Letters and correspondence discussed:

- Building a sustainable infrastructure for COVID-19 vaccinations [here](#)
- Whether SARS-CoV-2 has reached peak fitness [here](#)

Pre-peer review articles featured:

- The resurgence of SARS-CoV-2 infections associated with the Delta variant in England [here](#)
- Recovery from COVID-19 critical illness [here](#)

News and blogs

- Cases of Delta variant rise by 79% in the UK, but the rate of growth slows [here](#)
- “POVID” – predictions for a post-corona world [here](#)
