Janus kinase inhibitors, therapeutic anticoagulation with heparin, monoclonal antibodies REGEN-COV for COVID-19 prevention

**Peer reviewed journals featured:**

- A systematic review on clinical efficacy and safety of Janus kinase inhibitors for COVID-19 [here](#)
- Randomised clinical trials on:
  - Therapeutic anticoagulation with heparin in critically ill COVID-19 patients [here](#)
  - Therapeutic anticoagulation with heparin in noncritically ill COVID-19 patients [here](#)
  - Subcutaneous REGEN-COV antibody combination to prevent COVID-19 [here](#)
- A narrative review on the complications of nasal SARS-CoV-2 testing [here](#)
- Observational studies on:
  - Comparison of medication prescribing before and after COVID-19 among nursing home residents in Ontario [here](#) and associated commentary [here](#)
  - Clinical frailty score versus hospital frailty risk score for predicting mortality and other adverse outcome in hospitalised COVID-19 patients [here](#)
  - Accuracy of saliva and nasopharyngeal sampling for SARS-CoV-2 detection in community screening [here](#)
  - Dysregulated hematopoiesis in bone marrow marks severe COVID-19 [here](#)
  - COVID-19 restrictions and age-specific mental health [here](#)
- A case study on peer-professional leadership and the redesign of physician’s work [here](#)
- A case report of mucormycosis after COVID-19 in a patient with diabetes [here](#)
- Commentary on:
  - SARS-CoV-2 variants in patients with immunosuppression [here](#)
  - Contact tracing for COVID-19 [here](#)

**Letters and correspondence discussed:**

- Myocarditis and pericarditis after vaccination for COVID-19 [here](#)
- National and international guidelines on respiratory protection for health care professionals in COVID-19 [here](#)
Pre-peer review articles featured:

- Neutralisation effect of a single intramuscular injection of monoclonal antibody MAD0004J08 in healthy adults [here](#).

Guidance and reports:

- The Cochrane Library published a systematic review on interventions for the treatment of persistent post-COVID-19 olfactory dysfunction [here](#).

News and blogs

- Should treatments for COVID-19 be denied to people who have refused to be vaccinated? [here](#).
- Most symptomatic children recover within a week [here](#).
- NEJM audio interview on looking back and looking forward in COVID-19 - part 2 [here](#).
- Natural protection against COVID-19 in pregnancy [here](#).

Living Evidence Tables

Living Evidence tables are up-to-date summaries of emerging evidence. Tables are available on COVID-19 transmission, SARS-CoV-2 vaccines, and variants of concern, post-acute sequelae of COVID-19 (PASC), and surgery and COVID-19.
