High-intensity interval training after COVID-19 hospitalisation, impact of lockdown on key workers, vaccine passport

Peer reviewed journals featured:

- A randomised cross-over trial on high-intensity interval training after COVID-19 hospitalisation [here](#)
- A narrative review on real time molecular epidemiology for SARS-CoV-2 surveillance [here](#)
- Observational studies on:
 - The impact of lockdown on key workers in the UK [here](#)
 - Overlapping risks of type 2 diabetes and obesity on COVID-19 severity in the US [here](#)
 - The impact of vaccination on breakthrough COVID-19 infections [pre-Delta] [here](#)
- Commentary on:
 - The unequal impact of the COVID-19 crisis on minority ethnic groups [here](#)
 - The policy and ethical considerations for vaccine passport certification [here](#)
 - Self-care, social norms and anomie during COVID-19 in the UK [here](#)
 - Post-acute COVID-19 syndrome and kidney disease [here](#)

Letters and correspondence discussed:

- Preliminary findings of mRNA vaccine safety in pregnant persons [here](#)
- Proton pump inhibitors and the risk of severe COVID-19 in Hong Kong [here](#) and in Korea [here](#)

Pre-peer review articles featured:

- mRNA vaccination-associated myocarditis in children aged 12-17 years [here](#)
- A learning health system randomised trial of monoclonal antibodies for COVID-19 [here](#)

Guidance and reports

- The Therapeutic Goods Administration (TGA) released its COVID-19 vaccine weekly safety report [here](#)
