COVID-19 Critical Intelligence Unit

Daily evidence digest

7 October 2021

The daily evidence digest collates recently released reports and evidence – provision of these links does not imply endorsement nor recommendation.

Tocilizumab, hospital prevalence as a mortality risk factor, antiplatelet therapy, WHO statement on booster doses

Peer reviewed journals featured:

- Systematic reviews on:
 - o Tocilizumab for the treatment of hospitalised COVID-19 patients here
 - o Rapid diagnosis of COVID-19 in the first year of the pandemic here
- A randomised clinical trial of convalescent plasma in critically ill COVID-19 patients here
- Modelling studies on:
 - o Asymptomatic individuals and their impact on epidemic size here
 - o Government interventions against resurgence of COVID-19 in Europe here
- Observational studies on:
 - COVID-19 hospital prevalence as a risk factor for mortality <u>here</u>
 - o Antiplatelet therapy in COVID-19 here
 - Post-acute COVID-19 syndrome following mild SARS-CoV-2 infection <u>here</u>
 - o Tocilizumab reduces COVID-19 mortality based on dose and timing-dependent here
 - Effect of COVID-19 lockdowns on planned cancer surgery for 15 tumour types <u>here</u>
- Commentary on a UK Research Ethics Committee review of SARS-CoV-2 human infection challenge studies <u>here</u>

Pre-peer review articles featured:

- Preterm outcomes following COVID-19 lockdowns in Melbourne, Australia here and here
- A modelling study on non-pharmaceutical interventions and vaccinating school children in Delta variant outbreaks in Australia <u>here</u>
- Frequency of surveillance testing necessary to reduce Delta variant transmission here
- Initial SARS-CoV-2 viral load is associated with disease severity <u>here</u>
- COVID-19 neutralising antibody testing in fully vaccinated people during Delta variant spread <u>here</u>
- Effectiveness of Spikevax (Moderna) against Delta, Mu, and other emerging variants here
- Adverse events of special interest for COVID-19 vaccines here

Guidance and reports

- The World Health Organization published:
 - Guidance on infection prevention and control during healthcare when COVID-19 is suspected or confirmed <u>here</u>
 - Its latest COVID-19 epidemiological report <u>here</u>
 - An interim statement on booster doses for COVID-19 vaccination here
- The UK Health Security Agency published an update on SARS-CoV-2 variants of concern and variants under investigation <u>here</u>

News and blogs

- Confronting future pandemics <u>here</u>
- Unpacking vaccine "hesitancy" here
- COVID-19 vaccines cut the risk of transmitting Delta, but not for long here

Living Evidence Tables

Living Evidence tables are up-to-date summaries of emerging evidence. Tables are available on <u>COVID-19 transmission</u>, SARS-CoV-2 <u>vaccines</u>, and <u>variants</u> of concern, <u>post-acute sequelae of</u> <u>COVID-19 (PASC)</u>, <u>surgery and COVID-19</u>, <u>rapid testing</u> and <u>risk mitigation strategies</u>.
