## COVID-19 Critical Intelligence Unit

### **Daily evidence digest**

13 April 2022

The daily evidence digest collates recently released reports and evidence – provision of these links does not imply endorsement nor recommendation.

# Myopericarditis after vaccination, long COVID occurrence, BA.1 and BA.2 immune response in naïve and prior infected persons

#### Peer reviewed journals featured:

- A systematic review on myopericarditis after COVID-19 vaccination and non-COVID-19 vaccination here and associated commentary here
- Observational studies on:
  - Long COVID occurrence in COVID-19 survivors in Japan <u>here</u>
  - Risk of adverse events after COVID-19 in Danish children and adolescents and Comirnaty (Pfizer) effectiveness in adolescents <a href="here">here</a>
  - Postmortem assessment of olfactory tissue degeneration and microvasculopathy in COVID-19 patients <u>here</u>
- Modelling studies on:
  - o Screening, quarantine, and isolation strategies in Taiwan here
  - Dosing interval strategies for two-dose COVID-19 vaccination in 13 middle-income countries of Europe <a href="here">here</a>

#### Letters and correspondence discussed:

- What comes next in the COVID-19 pandemic? <a href="here">here</a>
- Incident rate ratios after booster vaccination <u>here</u>

#### Pre-peer review articles featured:

- Omicron BA.1 and BA.2 immune response in naive and prior infected persons here
- SARS-CoV-2 reinfections with Omicron in fully vaccinated people in the northeast of Brazil <a href="here">here</a>
- Effectiveness of 2 and 3 mRNA vaccine doses against Omicron and Delta infections in US outpatients <u>here</u>
- COVID-19 infection and vaccination responses to SARS-CoV-2 variants <u>here</u>
- Characteristics and outcomes of COVID-19 patients during Omicron dominance compared to Delta in 89 German hospitals <a href="here">here</a>

#### **Guidance and reports**

- The National COVID-19 Clinical Evidence Taskforce released updated recommendations and clinical flowcharts here
- The Therapeutic Goods Administration (TGA) issued provisional approval to Pfizer for the use of COMIRNATY as a booster for aged 12–15 years old <a href="here">here</a>

#### News and blogs

• Hospital and ambulance services struggle with huge demand and staff illness in England here
