

# CIAP Newsletter

## New: Ovid discovery personal profile

You can now use your Stafflink ID to login to your personal profile on CIAP.

This allows you to:

- Bookmark your favourite resources
- Create table of contents alerts for journals
- Save search strategies and receive email updates
- Access LHD and CIAP content in one area

Check out the [video tutorial](#) or [instruction sheet](#) to learn how to use the new system.

## What is the diagnosis?

A 50-year-old man with a history of several months of productive cough presented to the emergency department with stupor and hypercarbic respiratory failure.

On bronchoscopy, several casts, as shown, were retrieved. Follow-up CT of the chest showed only bibasilar atelectasis. What is the etiology of his casts?

[Find out the answer here](#) from the New England Journal of Medicine.

The New England Journal of Medicine <https://www.nejm.org/acs/hcn.com.au/image-challenge?ci=20220217>

Access provided by CIAP.

## How long does SARS-CoV-2 stay in the body?

What happens to SARS-CoV-2 when it enters the body, how long does it linger and what are the health implications for long Covid?

Read more about the timing here in [The BMJ](#).

Access provided by CIAP.

## Voices from the 'resus room':

An integrative review of the resuscitation experiences of nurses.

Although the literature recognises that resuscitation efforts are highly stressful events, little information is known about how nurses experience these situations.

By describing what is known about how nurses experience resuscitations through the process of this integrative review, we can better understand the resuscitative context nurses work within and identify the conditions that support or hamper their delivery of safe and effective resuscitative care.

Find out about the integrative review here in the [Journal of Clinical Nursing](#).

Access provided by CIAP.

## New: Request Ovid training

Live online training has moved to an on demand service.

You can request:

- Traditional overview training of Ovid resources
- 1 on 1 or small group coaching sessions
- Tips & tricks overview sessions
- Ovid research tools training e.g Medline, Embase etc.

This does not replace CIAP training and our extensive range of CIAP Overview Sessions and full day Advanced Workshops are available [here](#).

Check out all the training and learning options on CIAP [here](#).

## Repetitive transcranial magnetic stimulation for patients with major depressive disorder

Despite more than 25 years of research establishing the antidepressant efficacy of repetitive transcranial magnetic stimulation, there remains uncertainty about the depth and breadth of this evidence base.

Confusion remains as to where repetitive transcranial magnetic stimulation fits in the therapeutic armamentarium in the management of patients with mood disorders.

Check out the findings in full research article here in the [Australian & New Zealand Journal of Psychiatry](#).

The CIAP Mental Health Workshop is also taking place on August 4th 2022. To learn more about the workshop and to register [click here](#).

Access provided by CIAP.

## Upcoming CIAP Events

### Live Online Training

CIAP Overview  
5, 6, 7, 12, 13, 14 July  
14:30 - 15:30

[Register Here](#)

### Workshops

Mental Health Workshop  
4 August

Advanced Searching  
16 August

Nursing & Midwifery Workshop  
1 September

Evidence-Based Practice Workshop  
14 September

[Register Here](#)

Need help with CIAP?

Contact the [CIAP helpdesk](#) 24 hours, 7 days a week.  
1300 28 55 33 or click on [Support](#) from the top menu  
on CIAP.
